

Introduction to Open CL on FPGAs (Intel Coursera)

Week 3 - Open CL Execution

Question 1:

Before launching a kernel, the host must do the which of the following?

- ☐ Create program
- ☐ Create kernel
- ☐ Setup kernel arguments
- ☒ All of the above

(The host must first create the program, then create the kernel and finally set up kernel arguments before launching a kernel.)

Question 2:

The aocx file contains the following:

- ☐ Error codes
- ☒ FPGA programming image
- ☐ OpenCL executables
- ☐ CPU executables
