

# Introduction to Open CL on FPGAs (Intel Coursera)

## Week 3 - Host and Kernel execution

Question 1:

By default, the \_\_\_\_\_ uses the enqueue command to launch device tasks  
\_\_\_\_\_

- ☐ kernel, synchronously
- ☒ host, asynchronously
- ☐ host, synchronously
- ☐ Kernel, asynchronously

(By default, with enqueue commands, the host launches device tasks asynchronously, unless explicit synchronization is specified.)
