

Introduction to Open CL on FPGAs (Intel Coursera)

Week 2 - Host and Device Interactions

Question 1:

From Exercise 1, which function told you the devices in the selected platform?

- ☒ `getDevices()`
- ☐ `getContext()`
- ☐ `getQueue()`
- ☐ `getPlatforms()`

Question 2:

How is device memory represented on the host?

- ☒ As pointers
- ☐ As linked lists
- ☐ As buffers
- ☐ It can't be accessed from the host

(Memory is converted to pointers in the kernal)
